CAREER OBJECTIVE

Ruby on Rails developer with 3 years of experience building scalable, secure web applications. Proficient in backend development, third-party integrations, and RESTful APIs. Passionate about clean code, agile collaboration, and delivering value-driven solutions.

ACADEMIC RECORD

B.Tech (Computer Science Engineering)
Bansal College of Engineering, Bhopal — 2019–2023 **| 84.80%**
12th, Govt. Boys H.S. School, Kotra, Bhopal — 2018–2019 | **78.6%**
10th, Govt. Boys H.S. School, Kotra, Bhopal — 2016–2017 | **81.5%**

WORK EXPERIENCE

Project #4: GitexGlobal24 – Seen CoWorking

Duration: Jul 2024 – Present
Description: A web platform that allows users to book co-working spaces and event venues based on availability and membership tiers (free or paid). The system dynamically adjusts access and pricing based on user subscriptions.

Responsibilities:

- Developed booking system, user management, and authentication

- Integrated Stripe, Google Calendar, SendGrid & Twilio

- Ensured responsive UI and subscription handling

Technologies: Ruby on Rails, PostgreSQL

Project #3: Pocket Dispatcher
Duration: Feb 2024 – Jun 2024
Description: A logistics management web application designed to streamline communication with delivery personnel and enable real-time shipment tracking.

Responsibilities:

- Developed authentication features including email/mobile sign-up, login, and password management.

- Implemented full CRUD operations for managing users and shipment data.

- Integrated the **Geocoder** gem for real-time location tracking and address resolution.

Technologies: Ruby on Rails, PostgreSQL

Project #2: Cashee KSA
Duration: Feb 2023 – Jan 2024
Description: A financial management application for kids and teens in Saudi Arabia, designed to teach money management, savings, and spending under parental supervision.

Responsibilities:

- Created and enhanced core application features for user engagement and financial education.

- Resolved bugs and implemented the "Challenge" feature to promote saving goals.

- Improved financial tracking tools and dashboards to enhance user experience.

- Contributed to features ensuring security and compliance with financial regulations.

Technologies: Ruby, Ruby on Rails, JavaScript, HTML5, CSS3, Bootstrap, PostgreSQL, Git, GitHub, GitLab, Slack, RSpec, Docker, Kubernetes, Elasticsearch, OpenAI APIs

Project #1: Vonahi Security

Duration: Jul 2022 – Jan 2023
Description: An automated network penetration testing platform (vPenTest) that simulates cyberattacks and generates detailed vulnerability reports for security teams.

Responsibilities:

- Developed backend features and optimized database queries to improve system performance.

- Implemented real-time monitoring and reporting functionalities.

- Contributed to ensuring compliance with security standards and enhancing platform usability.

    Technologies: Ruby on Rails, JavaScript, jQuery, HTML, CSS, PostgreSQL, Sidekiq

TECHNICAL SKILLS

Programming Languages: Ruby, JavaScript
Web Technologies: HTML5, CSS3, SASS, Bootstrap
Frameworks & Libraries: Ruby on Rails, jQuery
Database Systems: PostgreSQL, MySQL
DevOps & Tools: Git, GitHub, GitLab, Docker (basic), Kubernetes
Testing: RSpec
Other: RESTful APIs, OpenAI APIs, Elasticsearch, Sidekiq, Redis

CERTIFICATIONS

- HackerRank Certification in SQL (Basic)
